how it can help you?

How is Darts-ip different?

What is Darts-ip?

Global IP cases and analytics. It took ten years to collect, analyze and build the right platform for users to access and benefit from millions of court documents from all over the world.

What is "reinventing the game"?

Being IP-centric has allowed us to reinvent IP legal research. We enable research from an IP-centric perspective.

How is Darts-ip different?

We are IP-centric/ All of our cases and analysis is centered around the underlying IP assets in a case.

Since IP assets are often asserted in multiple jurisdictions being IP-centric necessitates having global coverage!

How Darts-ip can help you?

Efficiency and thoroughness. Use Darts-ip to better serve your own clients. Find more data, useful data, and find it faster.

IP centric case law and analysis

Court

Search decisions of specific courts

Dates and reference

Search decisions by date, date range or reference

Party names

Search by name (as plaintiff or defendant)

Type of action

Search by: infringement action, cancellation action, opposition, revocation action, etc.

Trademark

Search by trademark name or figurative element

Nice classes

Search cases by selecting or excluding Nice classes

Relevant public

Search decisions discussing the level of attention of the relevant public

Product compared

Search decisions based on the set of products or services compared in the decision

Settlement

Was the action withdrawn, and was it through a settlement?

Points of law

Search decisions by legal topic (distinctiveness, reputation, defenses, similarity between trademarks, etc.)

Outcome

Who lost or won the case

Four ways to use Darts-ip case law and analysis

Risk management

Handicap likely outcomes, manage expectations.

Portfolio analysis

Monitor global activity on any grouping of patents or tech areas.

Legal arguments

Find winning arguments from cases like yours.

Business intelligence

Track competitors and adversaries as well as, collaborators and associates.

Save time find amazing data

"..find cases that match your situation; the same decision maker, considering the same technology, and the same point of law."

Search with IP-centric data technology – inventor / owner, read the original decisions

Verbal comparison tool

No matter how far down the road you are, the question is the same, "Are these marks similar?" Darts-ip can help you find out how others have answered in similar cases.

For example: Zhalux v. Haluz

| | | | | | | | | | | | | |

1,439

case(s), 1,566 document(s)
as of november 2020

Pro-tip:

Use our internal reference option to recall searches & bill clients.

About Clarivate | Darts-ip

Darts-ip collects information from over 140+ countries around the world, encompassing 3,800+ courts and offering access to documentation from over 5 million cases through the Darts-ip platform.

The purpose of this document is to provide a consolidated summary of the scope of collection activity. This summary is comprehensive, though nonexhaustive, in its scope, giving an overview of the collection status of IP litigation and prosecution information in each country. The countries in this document are grouped by legal perspective – with the aim to provide an overview of collection declining from the same legal structures.

Within the legal perspective, countries are ordered alphabetically.

For each individual country, there is a breakdown of the IP domains (Trademark, Patent, Copyright, Domain Names, Design and Model, Unfair Competition) we gather data from, as well as a highlighted

section of the key courts for each jurisdiction. In addition, this provides information on the document types (for example: complaints, hearings, main proceedings, etc...) collected along with the frequency of their collection (daily, weekly, monthly, quarterly, semesterly) and timeframe for availability in the Darts-ip platform from time of publication to processing, analysis and upload.

Darts-ip has been collecting case documents since 2006, but our collection reaches back into the historical archives of many jurisdiction, therefore in addition to collection rate, this document provides the first year from which our collection begins and indicates the start date of regular collection. This document is revised on a regular basis to ensure an up to date repository of all of Darts-ip's collections activities of a global scale.

For any questions you may have about the collection activity of Darts-ip, or region-specific requests, please do reach out to info@darts-ip.com
